

S&C & PL NW&C & Eastern Track Renewals Framework

We currently provide Overhead Line and E&P site planning, management and construction teams to fulfil a very extensive and demanding work schedule throughout the Northern East, East Coast Main Line, East Midlands and North West & Central routes. We have accident and incident free success rate over the CP6 control period demonstrating our ability to deliver projects safely for our client.

The task

To upgrade the S&C and PL track with associated OLE renewals by performing traction bonding, insulator replacements, campaign changes, and minor OLE upgrades.

The solution

Provision of construction management, supervisors, linesman to support the aid of construction.

The result

Continued incident & accident free success for the last 6 years with an extended 4 year contract to 2029.

Summary

To date provided skilled resource and to meet client requirements. Zero accident and incident record.
